

Nuclear physics with superconducting cyclotron at Kolkata : Scopes and possibilities

S. Bhattacharya

Variable Energy Cyclotron Centre, 1/AF, Bidhan Nagar, Kolkata - 700064, INDIA

With the successful commissioning of K500 superconducting cyclotron at the Variable Energy cyclotron Centre, Kolkata, activities are focused on the nuclear physics and related experimental facility development programmes. A general review of the nuclear physics research plans, including the present status of development of different detector arrays and other experimental facilities will be presented.
